

PLANTBOY

TAMIA DARK

Proposal

Plantboy is a 4 minute 2D animated film with an emphasis on whimsical character design and acting that will appeal to broad audiences alike.

I utilized programs such as Adobe Animate, Toon Boom Harmony and After Effects to achieve a stylistic, traditional look.

• Thesis Statement

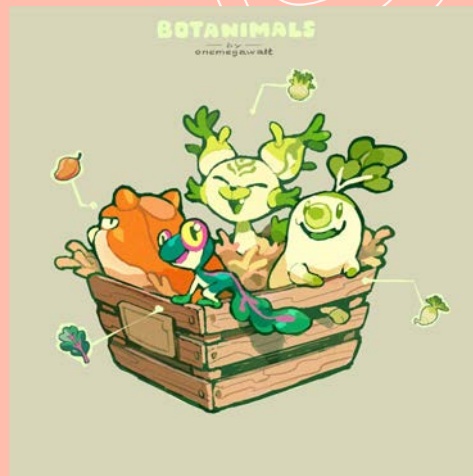

Family can be found anywhere, even in places we never would've expect. By taking a chance, we can forge beautiful bonds with others to fulfill the emotional needs we all experience. Eventually, we all come to take responsibility for something other than ourselves.

STORY

When a seed sprouts out a little creature boy instead of a vegetable, a farmer discovers the true meaning of what being a nurturing parent is like...even if the baby isn't very cute.

Production Pipeline

The background is a solid light green color. It is decorated with various abstract elements: a large, irregular light orange shape in the top right; a large, irregular light blue shape in the bottom center; a large red circle on the left side with a thin white outline; a thin red outline of a circle on the right side; and several small dots in red, white, and light blue scattered throughout.
